DATASHEET - DILK33-10(230V50HZ,240V60HZ)

Contactor for 3ph three-phase capacitors, 33.3kVAR

Part no. DILK33-10(230V50HZ,240V60HZ)

Catalog No. 294054 Eaton Catalog No. XTCC033D10F

Instructions In the case of group compensation multi-stage capacitor banks are connected to the mains, as required. Transient currents of up to 180 × le could flow between the capacitors. The capacitors are pre-charged via the early-make auxiliary contacts and the fitted wire resistors, thereby reducing the inrush current. The main contacts then close in a time-delayed manner and bring about the continuous current. Due to their special contacts, the contactors for the capacitors are weld-resistant for capacitors with inrush current peaks. Due to their special contacts, the contactors for capacitors are weld-resistant for capacitors with inrush current peaks up to 180 × I_e.
