## **DATASHEET - DILM32-XRL**

Reversing wiring kit, DILM17-32

DILM32-XRL Part no. Catalog No. 283109 Eaton Catalog No. **XTCEXRLC EL-Nummer** 4131898 (Norway)

**Delivery program** 

Product range	Accessories
Accessories	Wiring accessories
Description	Main current wiring for reversing combinations
For use with	DILM17 DILM25 DILM32 DILMF8 DILMF11 DILMF14 DILMF17 DILMF25
For use with	Reversing wiring kit DILM17 to DILM38

Technical data for design verification  Rated operational current for specified heat dissipation  Heat dissipation per pole, current-dependent  Equipment heat dissipation, current-dependent  Pvid  W  1.8  Static heat dissipation, current-dependent  Pvs  W  0  Heat dissipation capacity  Operating ambient temperature max.  Operating ambient temperature max.  Operating ambient temperature max.  10.2.3 Verification  10.2 Strength of materials and parts  10.2.3 Verification of thermal stability of enclosures  10.2.3.1 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  10.2.5 Lifting  10.2.6 Mechanical impact  Meets the product standard's requirements.	
Heat dissipation per pole, current-dependent  Equipment heat dissipation, current-dependent  Pvid W 1.8  Static heat dissipation, non-current-dependent Pvs W 0  Heat dissipation capacity  Operating ambient temperature max.  10.2 Strength of materials and parts  10.2.2 Corrosion resistance 10.2.3.1 Verification of thermal stability of enclosures  10.2.3.2 Verification of resistance of insulating materials to normal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  10.2.5 Lifting  Does not apply, since the entire switchgear needs to be evaluating to the entire switchgear needs to be evaluating to the entire switchgear needs to be evaluating to the product standard in the entire switchgear needs to be evaluating to the	
Equipment heat dissipation, current-dependent Pvid W 1.8  Static heat dissipation, non-current-dependent Pvs W 0  Heat dissipation capacity Pdiss W 0  Operating ambient temperature max. °C -25  Operating ambient temperature max. °C 60  IEC/EN 61439 design verification 10.2 Strength of materials and parts	
Static heat dissipation, non-current-dependent  Heat dissipation capacity  Operating ambient temperature max.  CC -25  60  IEC/EN 61439 design verification  10.2 Strength of materials and parts  10.2.2 Corrosion resistance  10.2.3.1 Verification of thermal stability of enclosures  10.2.3.2 Verification of resistance of insulating materials to normal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  10.2.5 Lifting  10.2.6 Mechanical impact  Pvs  W  0  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evalued to the product standard's requirements.  Does not apply, since the entire switchgear needs to be evalued to the product standard's requirements.	
Heat dissipation capacity  Operating ambient temperature max.  **C	
Operating ambient temperature max.  Operating ambient temperature max.  CC 60  IEC/EN 61439 design verification  10.2 Strength of materials and parts  10.2.2 Corrosion resistance  10.2.3.1 Verification of thermal stability of enclosures  10.2.3.2 Verification of resistance of insulating materials to normal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  10.2.5 Lifting  Operating ambient temperature max.  CC 60  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated to be evaluated to the entire switchgear needs to the entire switchgear needs to the entire switchgear needs to be evaluate	
Operating ambient temperature max.  IEC/EN 61439 design verification  10.2 Strength of materials and parts  10.2.2 Corrosion resistance  10.2.3.1 Verification of thermal stability of enclosures  10.2.3.2 Verification of resistance of insulating materials to normal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  10.2.5 Lifting  10.2.6 Mechanical impact  Poes not apply, since the entire switchgear needs to be evaluating materials to abnormal heat and fire due to internal electric effects  10.2.5 Lifting  10.2.6 Mechanical impact  Poes not apply, since the entire switchgear needs to be evaluating materials to be evaluating materials to be evaluating materials to abnormal heat and fire due to internal electric effects  Does not apply, since the entire switchgear needs to be evaluating materials to abnormal heat and fire due to internal electric effects  Does not apply, since the entire switchgear needs to be evaluating materials to abnormal heat and fire due to internal electric effects  Does not apply, since the entire switchgear needs to be evaluating materials to abnormal heat and fire due to internal electric effects  Does not apply, since the entire switchgear needs to be evaluating materials to abnormal heat and fire due to internal electric effects	
IEC/EN 61439 design verification  10.2 Strength of materials and parts  10.2.2 Corrosion resistance  10.2.3.1 Verification of thermal stability of enclosures  10.2.3.2 Verification of resistance of insulating materials to normal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated to be evaluated to the entire switchgear needs to the entire switchge	
10.2 Strength of materials and parts  10.2.2 Corrosion resistance  Meets the product standard's requirements.  10.2.3.1 Verification of thermal stability of enclosures  Meets the product standard's requirements.  10.2.3.2 Verification of resistance of insulating materials to normal heat  Meets the product standard's requirements.  10.2.4 Resistance to ultra-violet (UV) radiation  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated to the entire switchgear needs to the entire switchgear needs to be evaluated to the entire switchgear needs to the entire switchgear need	
10.2.2 Corrosion resistance  Meets the product standard's requirements.  10.2.3.1 Verification of thermal stability of enclosures  Meets the product standard's requirements.  10.2.3.2 Verification of resistance of insulating materials to normal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  Meets the product standard's requirements.  Meets the product standard's requirements.  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated to be evaluated to be evaluated to the switchgear needs to the switchgear needs to be evaluated to the switchgear needs to the switchgear needs to be evaluated to the switchgear needs to the swit	
10.2.3.1 Verification of thermal stability of enclosures  10.2.3.2 Verification of resistance of insulating materials to normal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  10.2.5 Lifting  10.2.6 Mechanical impact  Meets the product standard's requirements.  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated to be evaluated.	
10.2.3.2 Verification of resistance of insulating materials to normal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  10.2.5 Lifting  10.2.6 Mechanical impact  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated to be evaluated and the product standard's requirements.	
10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  10.2.5 Lifting  10.2.6 Mechanical impact  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated to be evaluated to the entire switchgear needs to the	
and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  Meets the product standard's requirements.  10.2.5 Lifting  Does not apply, since the entire switchgear needs to be evaluable.  10.2.6 Mechanical impact  Does not apply, since the entire switchgear needs to be evaluable.	
10.2.5 Lifting  Does not apply, since the entire switchgear needs to be evaluated by the entire switchgear needs to be	
10.2.6 Mechanical impact  Does not apply, since the entire switchgear needs to be evaluated by the entire switchgear ne	
· · · · · · · · · · · · · · · · · · ·	ated.
10.2.7 Inscriptions  Magte the product standard's requirements	ated.
10.2.7 mooripuono	
10.3 Degree of protection of ASSEMBLIES  Does not apply, since the entire switchgear needs to be evaluated by the entire switchgear needs to be evaluated by the entire switchgear needs to be evaluated by the entire switch	ated.
10.4 Clearances and creepage distances  Meets the product standard's requirements.	
10.5 Protection against electric shock  Does not apply, since the entire switchgear needs to be evaluated by the entire switchgear needs to be evaluated by the entire switchgear needs to be evaluated by the entire switch	ated.
10.6 Incorporation of switching devices and components  Does not apply, since the entire switchgear needs to be evaluated by the entire switchgear needs to be evaluat	ated.
10.7 Internal electrical circuits and connections Is the panel builder's responsibility.	
10.8 Connections for external conductors Is the panel builder's responsibility.	
10.9 Insulation properties	
10.9.2 Power-frequency electric strength Is the panel builder's responsibility.	
10.9.3 Impulse withstand voltage	
10.9.4 Testing of enclosures made of insulating material ls the panel builder's responsibility.	
10.10 Temperature rise  The panel builder is responsible for the temperature rise calculation provide heat dissipation data for the devices.	ulation. Eaton will
10.11 Short-circuit rating  Is the panel builder's responsibility. The specifications for the observed.	switchgear must b
10.12 Electromagnetic compatibility  Is the panel builder's responsibility. The specifications for the observed.	switchgear must b
10.13 Mechanical function  The device meets the requirements, provided the information leaflet (IL) is observed.	in the instruction

## Technical data ETIM 6.0 Low-voltage industrial components (EG000017) / Wiring set for power circuit breaker (EC002050) Electric engineering, automation, process control engineering / Low-voltage switch technology / Circuit breaker (LV < 1 kV) / Wiring set for circuit breaker (ecl@ss8.1-27-37-04-24 [ACN957008]) Suitable for number of poles Model Reversing switching

## **Approvals**

• •	
Product Standards	IEC/EN 60947-4-1; UL 508; CSA-C22.2 No. 14-05; CE marking
UL File No.	E36332
UL Category Control No.	NLRV
CSA File No.	012528
CSA Class No.	3211-04
North America Certification	UL listed, CSA certified
Specially designed for North America	No
