

Safety position switch, 1N/O+1N/C, insulated material, +actuator ZB, spring clamp connection

Powering Business Worldwide™

Part no. LS-11-ZB 106819 Article no. Catalog No. LS-11-ZB

# **Delivery programme**

| Basic function  |    | Position switches<br>Safety position switches   |
|---|----|---|
| Part group reference                                  |    | LS(4)ZB   |
| Product range   |    | Safety position switches  |
| Degree of Protection                                  |    | IP66  |
| Features  |    | Complete unit   |
| Ambient temperature                                   | °C | -25 - +70   |
| Description   |    | With the actuator inserted, the N/O contact is open and the NC contact is closed.   |
| Approval  |    | Prüka   |
| Contacts  |    |   |
| N/O = Normally open                                   |    | 1 N/0   |
| N/C = Normally closed                                 |    | 1 NC →  |
| Notes   |    | e safety function, by positive opening to IEC/EN 60947-5-1  |
| Contact sequence                                      |    | $ \begin{array}{cccccccccccccccccccccccccccccccccccc$   |
| Housing   |    | Insulated material  |
| Connection type                                       |    | Cage Clamp  |
| Notes   |    | Cage-Clamp is a registered trademark of Wago Kontakttechnik, 32432 Minden, Germany. Accessories for the Cage-Clamp terminals from Wago:power comb, gray, Wago Article No. 264-402 |
| Notes Switch must never be used as a mechanical stop! |    |   |

Actuator can be repositioned for horizontal or vertical mounting.

The operating heads can be turned manually in 90° steps to suit the specified level of actuation.

With the actuator inserted, the N/O contact is open and the N/C contact is closed.

For degree of protection IP65, use V-M20 (206910) cable glands with connecting thread of max. 9 mm length.

## **Technical data**

| General              |                 |  |

# **Design verification as per IEC/EN 61439**

Actuating force at beginning/end of stroke

| Design vernication as per 126/214 01433   |                   |    |  |
|---|-------------------|----|--|
| Technical data for design verification  |                   |    |  |
| Rated operational current for specified heat dissipation  | In                | Α  | 6  |
| Heat dissipation per pole, current-dependent  | $P_{\text{vid}}$  | W  | 0.17   |
| Equipment heat dissipation, current-dependent   | P <sub>vid</sub>  | W  | 0  |
| Static heat dissipation, non-current-dependent  | $P_{vs}$          | W  | 0  |
| Heat dissipation capacity   | P <sub>diss</sub> | W  | 0  |
| Operating ambient temperature min.  |                   | °C | -25  |
| Operating ambient temperature max.  |                   | °C | 70   |
| EC/EN 61439 design verification   |                   |    |  |
| 10.2 Strength of materials and parts  |                   |    |  |
| 10.2.2 Corrosion resistance   |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.1 Verification of thermal stability of enclosures  |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat  |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects $$ |                   |    | Meets the product standard's requirements.                         |
| 10.2.4 Resistance to ultra-violet (UV) radiation  |                   |    | Meets the product standard's requirements.                         |
| 10.2.5 Lifting  |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.2.6 Mechanical impact  |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.2.7 Inscriptions   |                   |    | Meets the product standard's requirements.                         |
| 10.3 Degree of protection of ASSEMBLIES   |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.4 Clearances and creepage distances  |                   |    | Meets the product standard's requirements.                         |
| 10.5 Protection against electric shock  |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.6 Incorporation of switching devices and components  |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |

N

10/5 (plug-in/pull-out)

| 10.7 Internal electrical circuits and connections        | Is the panel builder's responsibility.   |
|--|--|
| 10.8 Connections for external conductors                 | Is the panel builder's responsibility.   |
| 10.9 Insulation properties                               |  |
| 10.9.2 Power-frequency electric strength                 | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage                         | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material | Is the panel builder's responsibility.   |
| 10.10 Temperature rise                                   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                               | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility                      | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function                                | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
