

Motor-protective circuit-breaker, 3p, Ir=4-6.3A

Part no. Article no. Catalog No. PKZM01-6,3 278483 XTPB6P3BC1

#### **Delivery programme**

| Product range  |                 |  | PKZM01 motor protective circuit-breakers up to 16 A with pushbutton actuation   |
|--|-----------------|--|---|
| Basic function   |                 |  | Motor protection  |
|  |                 |  | IE3 🗸   |
| Notes  |                 |  | Also suitable for motors with efficiency class IE3.<br>IE3-ready devices are identified by the logo on their packaging. |
| Contact sequence   |                 |  |   |
| Max. motor rating  |                 |  |   |
| AC-3   |                 |  |   |
| 220 V<br>230 V<br>240 V  | Р               | kW                                       | 1.1   |
| 380 V<br>400 V<br>415 V  | Ρ               | kW                                       | 2.2   |
| 440 V  | Р               | kW                                       | 3   |
| Setting range  |                 |  |   |
| Overload releases  | I <sub>r</sub>  | A  | 4 - 6.3   |
| Short-circuit releases   |                 |  |   |
| max.   | I <sub>rm</sub> | А  | 97.7  |
| Connection technique   |                 |  | Screw terminals   |
| Notes  |                 |  |   |

### **Technical data**

| General             |   |    |  |
|---------------------|---|----|--|
| Standards           |   |    | IEC/EN 60947, VDE 0660   |
| Climatic proofing   |   |    | Damp heat, constant, to IEC 60068-2-78<br>Damp heat, cyclic, to IEC 60068-2-30 |
| Ambient temperature |   |    |  |
| Storage             | 9 | °C | -40 - +80  |
| Open                |   | °C | -25 - +55  |
| Enclosed            |   | °C | - 25 - 40  |

| Mounting position   |                  |                   | 90° - 90°  |
|---|------------------|-------------------|--|
| Direction of incoming supply  |                  |                   | as required                                      |
| Degree of protection  |                  |                   |  |
| Device  |                  |                   | IP20   |
| Terminations  |                  |                   | IPOO   |
| Protection against direct contact   |                  |                   | Finger and back-of-hand proof                    |
| Mechanical shock resistance half-sinusoidal shock 10 ms to IEC 60068-2-27                   |                  | g                 | 25   |
| Altitude  |                  | m                 | 2000   |
| Terminal capacity screw terminals   |                  | mm <sup>2</sup>   |  |
| Solid   |                  | mm <sup>2</sup>   | 1 x (1 - 6)<br>2 x (1 - 6)                       |
| Flexible with ferrule to DIN 46228  |                  | mm <sup>2</sup>   | 1 x (1 - 6)<br>2 x (1 - 6)                       |
| Solid or stranded   |                  | AWG               | 18 - 10  |
| Specified tightening torque for terminal screws   |                  |                   |  |
| Main cable  |                  | Nm                | 1.7  |
| Control circuit cables  |                  | Nm                | 1  |
| Main conducting paths   |                  |                   |  |
| Rated impulse withstand voltage   | U <sub>imp</sub> | V AC              | 6000   |
| Overvoltage category/pollution degree   |                  |                   | 111/3  |
| Rated operational voltage   | U <sub>e</sub>   | V AC              | 690  |
| Rated uninterrupted current = rated operational current                                     | $I_u = I_e$      | А                 | 16 or current setting of the overcurrent release |
| Rated frequency   | f                | Hz                | 40 - 60  |
| Rated frequency   |                  | Hz                | 40 - 60  |
| Current heat loss (3 pole at operating temperature)   |                  | W                 | 6  |
| Lifespan, mechanical  | Operations       | x 10 <sup>6</sup> | 0.05   |
| Lifespan, electrical (AC-3 at 400 V)  | Operations       | x 10 <sup>6</sup> | 0.05   |
| Maximum operating frequency   |                  | Ops./h            |  |
| Max. operating frequency  |                  | Ops/h             | 25   |
| Short-circuit rating  |                  |                   |  |
| DC  |                  |                   |  |
| Short-circuit rating  |                  | kA                | 60   |
| Short-circuit rating  |                  |                   | 60   |
| Motor switching capacity  |                  | kA <sub>rms</sub> |  |
| AC-3 (up to 690 V)  |                  | А                 | 16   |
| DC-5 (up to 250 V)  |                  | A                 | 16 (3 contacts in series)                        |
| Trip blocks   |                  |                   |  |
| Temperature compensation  |                  |                   | - n  |
| to IEC/EN 60947, VDE 0660   |                  | °C                | - 5 40   |
| Operating range   |                  | °C                | - 25 55  |
| Temperature compensation residual error for T > 40 °C<br>Setting range of overload releases |                  | v I               | ≦ <sub>0.25 %/K</sub><br>0.6 - 1                 |
|   |                  | x l <sub>u</sub>  |  |
| Short-circuit release fixed   |                  | x I <sub>u</sub>  | 15   |
| short-circuit release   |                  |                   | Basic device, fixed: 15.5 x I <sub>u</sub>       |
| Short-circuit release tolerance   |                  |                   | ± 20%  |
| Phase-failure sensitivity   |                  |                   | IEC/EN 60947-1-1, VDE 0660 Part 102              |

# Design verification as per IEC/EN 61439

| Technical data for design verification                   |                  |   |      |
|--|------------------|---|------|
| Rated operational current for specified heat dissipation | I <sub>n</sub>   | Α | 6.3  |
| Heat dissipation per pole, current-dependent             | P <sub>vid</sub> | W | 0    |
| Equipment heat dissipation, current-dependent            | P <sub>vid</sub> | W | 5.68 |

| Static heat dissipation, non-current-dependent  | P <sub>vs</sub>   | W  | 0  |
|---|-------------------|----|--|
| Heat dissipation capacity   | P <sub>diss</sub> | W  | 0  |
| Operating ambient temperature min.  |                   | °C | -25  |
| Operating ambient temperature max.  |                   | °C | 55   |
| IEC/EN 61439 design verification  |                   |    |  |
| 10.2 Strength of materials and parts  |                   |    |  |
| 10.2.2 Corrosion resistance   |                   |    | Meets the product standard's requirements.   |
| 10.2.3.1 Verification of thermal stability of enclosures  |                   |    | Meets the product standard's requirements.   |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat  |                   |    | Meets the product standard's requirements.   |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat<br>and fire due to internal electric effects |                   |    | Meets the product standard's requirements.   |
| 10.2.4 Resistance to ultra-violet (UV) radiation  |                   |    | Meets the product standard's requirements.   |
| 10.2.5 Lifting  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions   |                   |    | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances  |                   |    | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections   |                   |    | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors  |                   |    | Is the panel builder's responsibility.   |
| 10.9 Insulation properties  |                   |    |  |
| 10.9.2 Power-frequency electric strength  |                   |    | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage  |                   |    | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material  |                   |    | Is the panel builder's responsibility.   |
| 10.10 Temperature rise  |                   |    | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating  |                   |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility   |                   |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function   |                   |    | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

#### **Technical data ETIM 6.0**

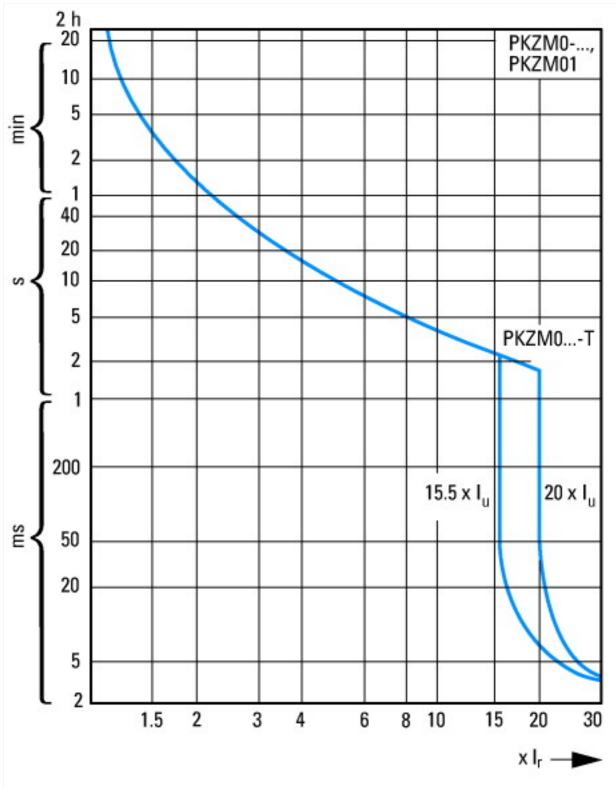

Low-voltage industrial components (EG000017) / Motor protection circuit-breaker (EC000074)

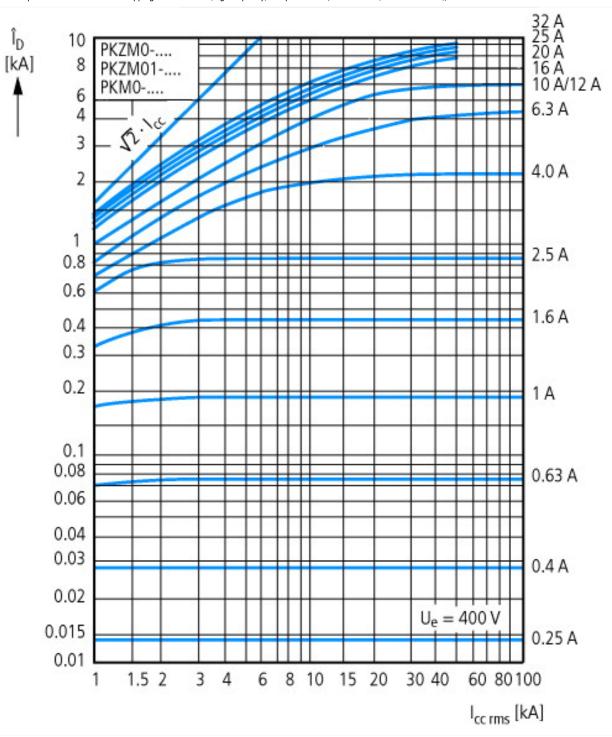

Electric engineering, automation, process control engineering / Low-voltage switch technology / Circuit breaker (LV < 1 kV) / Motor protection circuit-breaker (ecl@ss8.1-27-37-04-01 [AGZ529013])

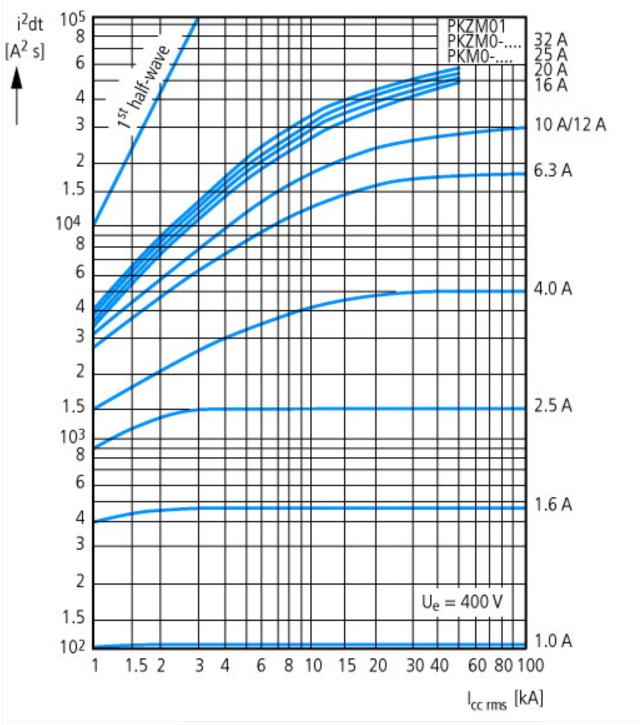

| Overload release current setting                       | А  | 4 - 6.3                                  |
|--|----|--|
| Adjustment range undelayed short-circuit release       | А  | 98 - 98                                  |
| Thermal protection                                     |    | No                                       |
| Phase failure sensitive                                |    | Yes                                      |
| Switch off technique                                   |    | Thermomagnetic                           |
| Rated operating voltage                                | V  | 690 - 690                                |
| Rated permanent current lu                             | А  | 6.3                                      |
| Rated operation power at AC-3, 230 V                   | kW | 1.1                                      |
| Rated operation power at AC-3, 400 V                   | kW | 2.2                                      |
| Type of electrical connection of main circuit          |    | Screw connection                         |
| Type of control element                                |    | Push button                              |
| Device construction                                    |    | Built-in device fixed built-in technique |
| With integrated auxiliary switch                       |    | No                                       |
| With integrated under voltage release                  |    | No                                       |
| Number of poles  |    | 3  |
| Rated short-circuit breaking capacity lcu at 400 V, AC | kA | 50                                       |
| Degree of protection (IP)                              |    | IP20                                     |
| Height   | mm | 93                                       |
| Width  | mm | 45                                       |
